

Comfort Zone acoustic tiles - climate balancing technology

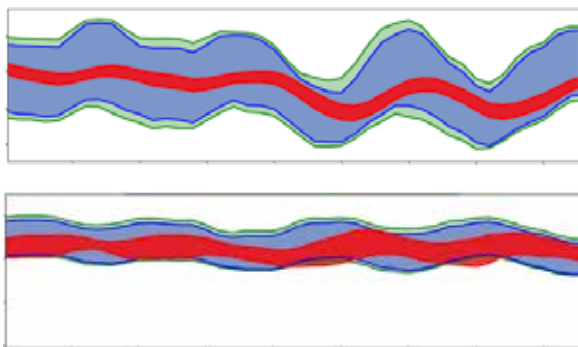

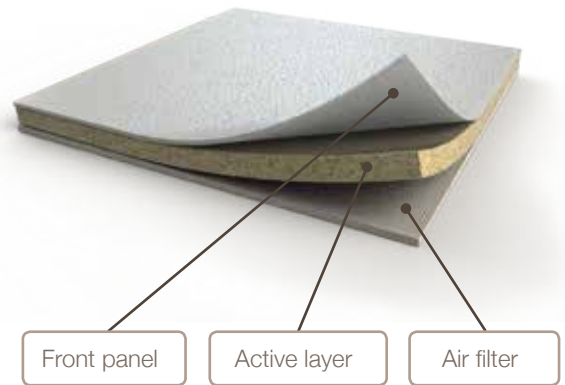

Upgraded acoustic tiles with a unique sustainable technology, that saves money on heating and cooling expenses. The tiles optimize temperature by balancing peaks and autonomously absorbing excess humidity and releasing it when needed.

Key Features

- Humidity stabilizing
- Temperature stabilizing
- Air filtering
- Self management
- Low maintenance
- Air quality compatible sensing features (CO₂, VOC, P-10)
- Sustainable design and natural materials
- Low electricity consumption
- Smart home enabled

| | |
|---|---|
| Dimensions | 61x61x12cm 121x121x12cm |
| Humidity exchange rate | 0.1kg H ₂ O per m ² per day |
| maximum energy output for cooling per meter | 15W |
| maximum energy output for heating per meter | 10W |
| Power consumption | 1W/M ² |
| Compatibilty | Apple HomeKit |
| Connectivity | WiFi 802.11n, Bluetooth |
