

# DEVELOPMENT TARGETS

**THERMOTERRA**  
improving the climate

## The revolutionary mass wood stove

Clean, cost-effective climate balancing technology.

### Temperature

Store excessive heat generated by your stove, and use it later when it's needed.

### Humidity

Humidify dry air when the stove is running, and dehumidify when it's off.

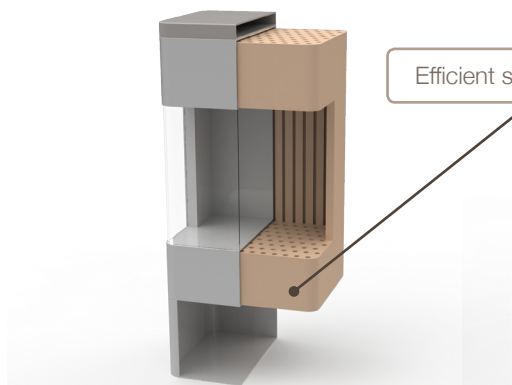

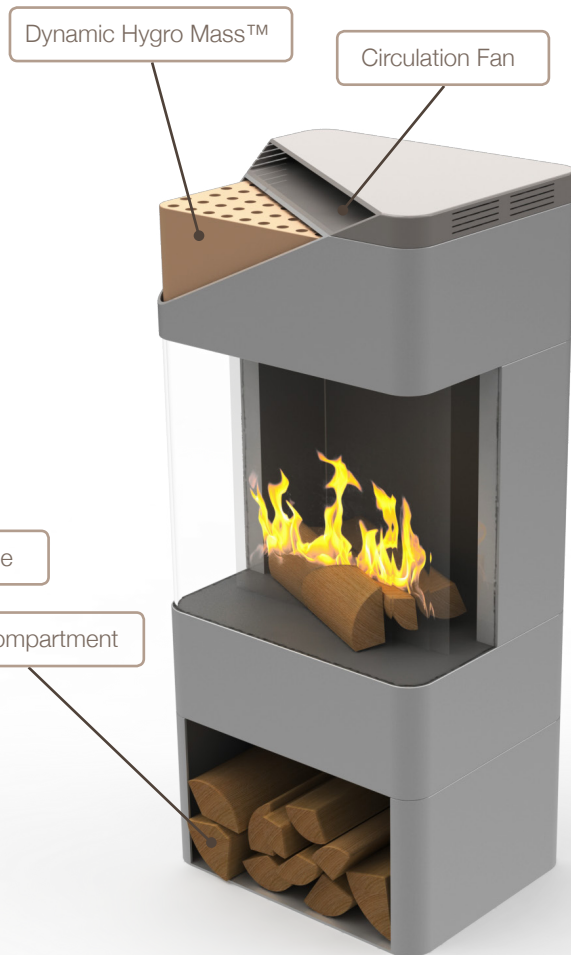

### DHM™

Dynamic Hygro Mass stores **X30** more energy per volume, comparing to mass stoves.

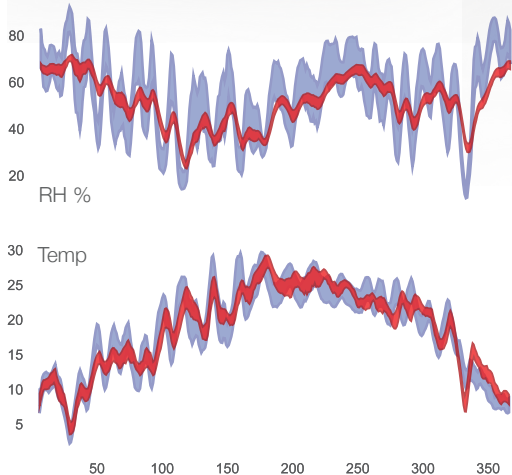

### Key Features:

- Heat your home when the stove is not running.
- Balance humidity, **also during the summer!**
- X30 more energy storage than a mass stove.
- Smart home enabled.
- No electricity consumption during winter, and low electricity consumption during the summer.
- Sustainable design and natural materials.

Efficient space usage

Log Compartment

■ Room with add-on ■ Room without add-on

Energy output	3kWh per day
Humidity exchange rate	3Kg H2O per day
Power consumption	20W
Dimensions	80X1300X64cm
Weight	150kg
Compatibility	Apple HomeKit, Google Home
Connectivity	WiFi 802.11n, Bluetooth
